

FREE GIVEAWAY

FREE! GIVEAWAY AT THE END OF CLASS

FREE GIVEAWAY

- Exact plan we used to grow over \$1000+ of food in a small garden space
- ➤ Easy layout for maximizing space
- ➤ Scalable plan that fits any size garden!
- Grow 20 varieties of popular veggies and herbs
- ➤ Built in crop rotation

FREE GIVEAWAYS

WIN FREE PRIZES!

FREE DRAWINGS AT THE END OF EACH CLASS

BIG GIVEAWAY

WIN LIFETIME ACCESS

- ➤ Our ELITE Gardening Membership
- ➤ Your own personal Click 'n Drop Gardening Calendar
- ➤ Monthly LIVE meetings
- ➤ Private FB Group Access
- Access to our entire garden training library online

BIG GIVEAWAY

HOW TO PARTICIPATE

- ➤ Be active in the FB group
- Every post and comment is an entry to win
- ➤ The more entries (activity in the FB group) the higher your chance is of winning
- > DO NOT SPAM

RESOURCE CENTER

- ➤ In the FB group make sure to see the UNITS for each day
- ➤ All resources for each class session will be posted in the unit for that class and also will be sent by email

OVERVIEW:

- 1. DAY 1: Choosing what to grow and where to grow your winter garden
- 2. DAY 2: Timing your winter garden creating your planting calendar
- 3. DAY 3: Protecting your winter garden
- 4. DAY 4: BONUS! Q+A wrap-up

THE SIMPLE WAY

- 1. Gardening is full of decisions
- 2. The simple art of knowing:
 - 1. What to do (PLAN)
 - 2. How to do it (ACTION)
 - 3. And doing it at the right time (TIMING)
- 3. Power of the "Perpetual Harvest Hack"

WHAT TO DO

- 1. The list of crops you are going to grow
- 2. Seeding, transplanting, cultivating, watering, trellising, harvesting
- 3. Succession or "leapfrog" planting

WHAT IS LEAPFROG PLANTING?

- 1. What is leapfrog planting?
- 2. Each time you harvest have another crop ready to plant
- 3. Example with lettuce
- 4. Example with peas and green beans

LEAPFROG PLANTING

- 1. But leapfrog planting can be complex too
 - 1. You've got to figure out when to plant your first crop
 - 2. Then how long before it will be harvested
 - 3. And how long of a harvest window you can expect from it
 - 4. And then when to plant the second "leapfrog" crop so that it is ready to go in when the first crop is harvested
 - 5. Plus figure out how long in the season the crop can be grown
 - 6. And then repeat that for each crop because they are all different

LEAPFROG PLANTING

- 1. It really doesn't take that much more physical work.
- 2. Complicated? You bet it sure can be!
- 3. Unless you're using the "Perpetual Harvest Hack"!

HOW TO DO IT

- 1. How to seed your starts
- 2. How to transplant
- 3. How to cultivate
- 4. How to build healthy soil
- 5. How to trellis your plants
- 6. How to extend your season into the winter without breaking your pocketbook

WHEN TO DO IT

- 1. The timing of when to seed
- 2. When to seed succession plantings
- 3. When to transplant
- 4. When to harvest
- 5. Putting it all in a calendar
- 6. Weekly checklist for extreme clarity

T - ____

- 1. So, what is the single most critical factor for extending your season?
- 2. Great question and I think most of our minds would turn to heat or protection
- 3. T is for TIMING

- We want to protect our veggies from the cold and wind
- 2. That's all true, but before we get there we need the veggies themselves to protect and perhaps one of the easiest things to get wrong is timing

- The first critical factor when it comes to season extension is the timing of when you plant your veggies
- 2. Timing can make all the difference from having a harvest to no harvest at all

- 1. So, what happens is as the weather gets cooler and even more importantly as the day length decreases plants growth also slows down and will eventually come to a stop
- 2. As a general rule, plant growth slows down the most when days become 10 hours or shorter

T - TIMING

- ➤ During this period in the winter your plants won't actually be growing and hence our purpose in season extension isn't so much to grow plants in the winter as it is to keep them alive through the winter
- ➤ The critical factor then is to know when to plant your plants during the summer or fall so that they will be mature by the time winter sets in

T - TIMING

➤ Or if you are wanting early crops in the spring then you're simply dealing with the reverse (plants growth starts to speed up again like a bell curve) and you'll want to know when to plant them in the winter so that they will be at the right stage to harvest in the spring

PLANTING FOR A CONTINUAL HARVEST

Adapted from The New Organic Grower p. 260

- 1. Timing is perhaps the #1 thing that causes most winter gardens to fail
- 2. Find your frost dates
- 3. So, what if you do get your plants planted late? Can you save them?

➤ Truth is, that the day length factor with your days getting shorter is the greater factor when it comes to your plants growth slowing down – but heat does play its role as well

- ➤ Think of protection and warmth as a little buffer to encourage your plants to grow a little faster before the days get too short
- ➤ But definitely don't rely on heat to grow your veggies during the cold – it's much better and will save you time and energy to start your plants at the right time so that they will be mature as the winter sets in

- 3. Still quite a bit of work...

James Hunt started a conversation

JAN 31 @ 10:04 PM

Paul, I just watched the webinar replay. What a fantastic thing you have done for us! Thank you and Edwin and Natasha for all your hard work. I was just yesterday starting to sit down to the mind-boggling job of planning out this year's garden calendar...and I gave up. Now you have done it for me. God bless you all. I look forward to start using it soon.

Lucy

I love the new calendar. It keeps me on task and so far it has been working great! planted onions transplants, and direct seeded peas and radishes today.

CLICK'N DROP CALENDAR

- 1. Click 'N Drop Planting Schedules
- 2. Leapfrog Planting More Harvest in Less Space
- 3. Weekly Checklists of Garden Tasks
- 4. Detailed Instructions with Demonstration Videos

CLICK'N DROP CALENDAR

- 5. Easy Seeding or Harvest Filter
- 6. Your Frost Zone
- 7. Quick Links to Our Favorite Varieties

HOMEWORK

- 1. Download today's homework sheet
- 2. Find the calendar for your location and drop the crops you want to grow this winter into your gardening calendar
- 3. Complete the sheet and then celebrate by going LIVE in the FB group
